

Food Regulatory Training

Theoretical training service description

FRTRAIN11

Service description:

On-site training and consulting activity to help you develop an appropriate preparation and performance testing of culture media according to EN ISO 11133.

Topics covered by the service:

- Theoretical presentation on the different parameters to consider when developing preparation and performance testing of culture media:
 - ✓ General quality assurance, including documentation
 - ✓ Laboratory preparation, including storage and shelf life of culture media
 - ✓ Test organisms for performance testing, including usage of reference materials
 - ✓ Quantitative and qualitative methods of performance testing of liquid and solid culture media, reading and interpretation
- Customized test protocol allowing assessing the above parameters.
- Phone and e-mail support: follow-up of tests, analysis of raw data, interpretation of results, planning of next tests, advices on ways to remove interferences if applicable, calculation of expendables, practical recommendations, tips and tricks, sharing of our knowledge and expertise of the preparation and performance testing of culture media.

Duration:

Theoretical: 1 day.

Consulting support (phone and e-mail support): during 3 months from the initial testing.

Important Notes:

A Non-Disclosure Agreement may be signed between both parties to protect the Customer's sensitive information.
