

MOUSE ANTI-TUBULIN, BETA III ISOFORM MONOCLONAL ANTIBODY

CATALOG NUMBER:	MAB1637-50UL	QUANTITY:	50 µL
LOT NUMBER:		EPI TOPE:	C-terminus
CLONE NAME:	TU-20 (similar to TUJ1)	HOST/ISOTYPE:	Ms IgG ₁
BACKGROUND:	The beta III tubulin isoform is found exclusively in neuronal processes and has been used extensively to identify and image neurons.		
SPECIFICITY:	The antibody reacts with the C-terminus of the neuron specific beta III isoform of tubulin. Does not identify beta tubulin found in glial cells.		
IMMUNOGEN:	A synthetic peptide corresponding to amino acids 443-450 (ESESQGPK) of human class III beta-tubulin conjugated to KLH.		
APPLICATIONS:	Immunocytochemistry on fixed cells: 1:100 to 1:500. Immunohistochemistry on formalin fixed frozen or paraffin embedded tissue sections: 1:20 to 1:100. High temperature citrate buffer antigen retrieval is recommended with paraffin embedded tissue sections. Immunoblotting: 1:1,000. Antibody will detect a single band at 50 kDa corresponding to class III beta-tubulin. Immunoprecipitation ELISA Optimal working dilution must be determined by the end user.		
SPECIES REACTIVITY:	Avian, Mouse, Porcine (Pig), Rat, Bovine, Sheep, Human, Monkey. Reactivity with other species has not been confirmed.		
CONTROL:	Positive control: Brain tissue or neurons of any type. Negative control: Non neural tissue or Astrocytes.		
FORMAT:	Ascites.		
PRESENTATION:	Liquid in PBS containing 1% BSA and 15 mM sodium azide.		
STORAGE/HANDLING:	Maintain at -20°C in undiluted aliquots for up to 12 months after date of receipt. Avoid repeated freeze/thaw cycles.

Important Note: *During shipment, small volumes of product will occasionally become entrapped in the seal of the product vial. For products with volumes of 200 µL or less, we recommend gently tapping the vial on a hard surface or briefly centrifuging the vial in a tabletop centrifuge to dislodge any liquid in the container's cap.*

Unless otherwise stated in our catalog or other company documentation accompanying the product(s), our products are intended for research use only and are not to be used for any other purpose, which includes but is not limited to, unauthorized commercial uses, in vitro diagnostic uses, ex vivo or in vivo therapeutic uses or any type of consumption or application to humans or animals.
